

The California Primary Care Association and the Oral Health Access Council present

Rally Opposing the Elimination of Medi-Cal Optional Benefits

Tuesday, June 30, 2009

11:00 AM

**California State Capitol West Steps
Sacramento, CA**

Medi-Cal benefits like dental, optometry and podiatry are not optional for the millions of Californians who rely on them to eat, see, talk and walk.

The Administration and the Legislature have made a hasty decision to eliminate a program that not only provides care to more than 3 million low income Californians, but stimulates the California economy. Without Medi-Cal optional benefits, seniors, the disabled and children will suffer from decreased access to vital health care services.

Please join us on the day before the cut is scheduled to go into effect to express our outrage at the actions of our Governor and Legislature. There is still a chance to revive this critical program.
